Art Unit: 1761

Claims 1-11 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claims 1-11 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

None of the subject matter that is in the claims is fully described in the specification. The claims do not adequately describe the process wherein a fractionated fat is prepared. There is no suggestion of a high-pressure membrane filter and it is unclear to examiner what filter, among all of the filters that are available, might be selected. Also what interesterification process is contemplated by claim 10? What is melt crystallization?

A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. Note the explanation given by the Board of Patent Appeals and Interferences in *Ex parte Wu*, 10 USPQ2d 2031, 2033 (Bd. Pat. App. & Inter. 1989), as to where broad language is followed by "such as" and then narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd.

Art Unit: 1761

App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*, 86 USPQ 481 (Bd. App. 1949). In the present instance, claims 4-8 and 11 recite the broad recitation, and the claim also recites the preferable range, which is the narrower statement of the range/limitation.

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC (See 37 CFR 1.52(e)(5) and MPEP 608.05. Computer program listings (37 CFR 1.96(c)), "Sequence Listings" (37 CFR 1.821(c)), and tables having more than 50 pages of text are permitted to be submitted on compact discs.) or
REFERENCE TO A "MICROFICHE APPENDIX" (See MPEP § 608.05(a). "Microfiche Appendices" were accepted by the Office until March 1, 2001.)
- (e) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (f) BRIEF SUMMARY OF THE INVENTION.
- (g) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (h) DETAILED DESCRIPTION OF THE INVENTION.
- (i) CLAIM OR CLAIMS (commencing on a separate sheet).
- (j) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (k) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 1761

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 6 and 7 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Aini (JAOCS 76(5)643 and see Table 2, Table 1, page 643, col. 1 & 2.

Claims 1-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 2 it is unclear if applicant intends to include or exclude the list of oils that are in the claims. An amendment to the claim changing “such as” to –selected from the group consisting of– would overcome the rejection. Claim 1 is also confusing as to whether the liquid oil is blended with another oil or not. An amendment to the claim changing “to be blended with” to –and– would clarify what two oils are blended.

Claim 2, line 2 has an obvious typing error in the recitation “ploy”. It is not seen that the recitation “so that health claim...can be made” has any necessary bearing on a patent claim. Cancellation of this phrase is suggested.

Claim 3 is confusing because the claim is a product claim and not a process claim. If applicant desires to indicate that the product is trans-free, then the claims should be amended to state this feature.

In claims 4 & 5 there is no antecedent basis for “hard” palm fraction in an earlier claim. An amendment canceling “hard” would overcome the rejection.

Claim 6 is a process depending from a product and does not appear to be a proper dependent claim as it is drafted. Also the claim uses the passive voice in the recitation “is

Art Unit: 1761

selectively” and thus it is unclear if an active process step is intended or not. An amendment to the claim clarifying this issue would overcome the rejection.

Claims 7 & 8 also use the passive voice and are indefinite for the reasons set forth above. Claim 8 contains two sentences and this is not in an appropriate claim format.

In claim 10, the last 3 lines, starting with “thus eliminating” do not add essential substance to the claims. Cancellation of this part of the claim is suggested.
